If you want it all in one complete design this is the floor plan. The first floor greets you with a lofted ceiling throughout the living room and attached family room (with optional fireplace). The spacious kitchen has an area for dining and a pantry. A first floor powder room completes this well thought out living area.

The second floor is designed with your family in mind. The open floor plans includes a convenient second floor laundry and loft can be converted to an optional fourth bedroom.

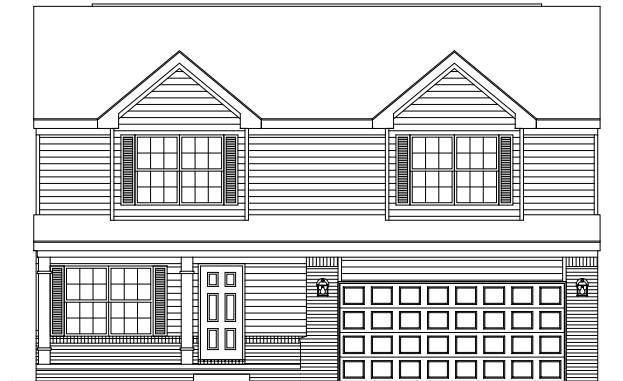

Off the central hallway, you will find the owner's suite with a private bath and walk-in closet. Its location provides you with the privacy and luxury you have been looking for.

The additional bedrooms have their own walk-in closets and the second bath is centrally located for easy access to all the rooms.

For the family who needs space and privacy this is the floor plan you must consider.
